Type of investment

Hotel unit or chain

Intended Partnership

Partners from the tourism and hotel business related area, interested in investing in the modification and/or operation of old mountain huts and former school buildings within a possible network of mountain lodges.

Brief description

The Municipality of Boticas has six school buildings and eleven "Mountain Huts", located in an area in privileged locations in various parts of the municipality. They are ideal for the creation of a network of lodges, designed to provide services of the hotel- and restaurant area, and thus contributing to the creation of a holistic product for the enhancement of tourism and environment in the region.

Embedded in magnificent landscape of a rare quietness and beauty, each of the huts offer a wide range of different accommodation, with high quality and characteristically for the municipality and based on the principles of Eco-tourism with regard to preservation and enhancement, and on activities of environmental animation through the huge offer of property and traditional values, natural and constructed.

During the occupation of each house, if on weekends, or in short holiday periods, their occupants will benefit from

the diversification of the closer environment including the magnificent landscape, visits to the region's built heritage and the "castros" (hill forts), walking tours, hunting, fishing, festivals and events that occur throughout the year, and the gastronomy, but especially the contact with the culture and the experiences of the countryside.

Project size: 1.000.000 euros
